FLOSION

Amy Tang, designer

Flosion is a multifunctional object, which accentuates great uses of practicality. A singular stool, a bench system or side table. The natural form, influenced by water waves. Flosion has a social dimension that brings people together. Connect the stools together to explore the unlimited potential of people's creativity and energy exchange. Users can simply shift the object in different positions to change functionality between a table, seat or bench. For residential, hotel foyer, bar lounges, nightclub or office halls. Ultimately it has huge potential in the commercial arena, not to mention its aesthetic beauty. An organic and pure object which is valued, durable and stands the test of time.
